Review Details for C-SSD

Hint

(1) Critical behaviour NOT active (function not active due to other calibration variables)

- NOT active trigger assessment and release from 2x Experts (Project + CoC)

(2) Critical behaviour Active (Disclosed to authorities OR not disclosed)

- Active trigger an evaluation via codex case
- Release 1x BST + Signatures according to ALM CES Process

In general, all descriptions shall be done in clear text to enable to understand for signature. A link to codex case shall be added as reference when already available.
