1. Bosch Product information

Customer:	HRAP
Project:	6SAY
Supported Bosch ECU Hardware:	MG1CA020
Supported ECU Software (PVER):	MG1CA020_6SAY_V011_TPROT
Data Version ID - customer: *Customer order number / Software version*	MG1CA020_6SAY_V011_TPROT_IND_MT_S_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_MT_VX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_MT_ZX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_CVT_S_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_CVT_VX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_CVT_ZX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_withGroups.a2l
Reason for delivery: *Add the reason for this delivery*	For MP1 Container creation and delivery
Name of issuer of this delivery:	Abhilash G (MS/EPA-PJ3-PS)
Data Version Maturity: ***Series*** *- Series Use, not limited* ***Series Limited*** *– Series Use, but Limited, description in*	MP1

© Robert Bosch GmbH reserves all rights even in the event of industrial property rights. We reserve all rights of disposal such as copying and passing on to third parties. Printed copies are working copies only.

usage restriction ***Non series*** *- In development, description of open points and/or usage restrictions required*	
Intended Use: *describe target EM/OBD type approval level (e.g. EU6d Final) and/or EM/OBD requirements in specific countries based on agreed customer request*	BS6-3(India) • MP1 container creation
ISO26262 Conformance status: *Does the data version meet the requirements of the ISO26262 standard with regard to the completion of the safety related series data tests in ECU-MST. If not ready for series use please consider notes in chapter 3.1*	MT • Level 2 is enabled. • Level 3 is enabled. CVT • Level 2 is enabled. • Level 3 is enabled.
Known Issues: *Are there any open items remaining which need to be considered when data version is used?* *Note for a series releases: named items are to be aligned with customer and to be approved by ARC RAS prior to delivery.*	No known issues
Usage Limitations/Restriction: *What are the limitations/restrictions to use the data version based on mentioned known issues?* *Note for a series releases: named items are to be aligned with customer and to be approved by ARC RAS prior to delivery.*	• This hex file should only be used with **C sample ECU**.
Result of Compliance SSD Check: ***For series:*** *not required as customer is expecting a released product*	Passed.

© Robert Bosch GmbH reserves all rights even in the event of industrial property rights. We reserve all rights of disposal such as copying and passing on to third parties. Printed copies are working copies only.

***For Series Limited or Non series**: pass or fail; distribute customer report for sharing, in consultation with customer, see list of documents provided.*

2. Parts list – list of files and documents

Description of File/Document	Name
The data version for this delivery *Hex or cdfx file or others*	MG1CA020_6SAY_V011_TPROT_IND_MT_S_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_MT_VX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_MT_ZX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_CVT_S_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_CVT_VX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_IND_CVT_ZX_HV007_HPT.hex MG1CA020_6SAY_V011_TPROT_withGroups.a2l
Calibration Responsibility and Status List *List of calibration data elements and assigned responsible person*	MY27-6SAY-E-A068_PAL_MG1CA020_6SAY_V05_20260507.xlsx
Compliance SSD Report *External compliance SSD report*	MY27-6SAY-E-A065_6SAY_MG1CA020_V011_TPROT_HV007_ComplianceReviewReport_updated.pdf
SW Documentation *Also known as function description, only to be delivered, if not already done, in this case give hint here*	MG1CA020_6SAY_V011_TPROT_0_EN_SWDoc.pdf

© Robert Bosch GmbH reserves all rights even in the event of industrial property rights. We reserve all rights of disposal such as copying and passing on to third parties. Printed copies are working copies only.

3. Particularities and restrictions

Bosch declines any liability if this data version is used outside of the released application scope (see chapter 1) or configuration restrictions.

3.1 Necessary measures in case of known issues or not finalized product release).

Appropriate measures must be taken in order to avoid endangerment due to malfunction of this software/data version documented in chapter 1. These measures must be adapted to the utilization and maturity of the software (possible measures may include utilization only on test tracks; provision of special trainings to the drivers; use of vehicles equipped with emergency stop switches; execution of appropriate checks). The choice of the appropriate measures as well as the utilization of development ECUs and software by other parties than Bosch is in the responsibility of the OEM.

3.2 Intended Use

The supplied calibration data (Bosch product) are suitable for use in vehicles which comply with the above-mentioned intended use (see chapter 1), as far as these vehicles are used in the target markets described in the Bosch HW TCD.

The legal requirements refer to the vehicle as a complete system and not to the Bosch product. Whether the vehicle meets the legal requirements depends on the interaction of all components in the overall system, which is not the responsibility of Bosch.

3.3 Handling of new software versions/data versions

After release of a new SW version for series production, all product lines at OEM which were jointly planned between Bosch and OEM for taking over that SW-version shall be replaced by the new SW version as soon as possible (“Time Period”).

In case of additional variant substructure within OEM’s product line handling, it is agreed that OEM within the Time Period shall take over the new SW version also for such additional variant substructures in accordance with the joint planning for the product lines.

The release of any software versions preceding the new SW version will expire for the affected product lines and potential additional variant substructures after the Time Period has elapsed.

© Robert Bosch GmbH reserves all rights even in the event of industrial property rights. We reserve all rights of disposal such as copying and passing on to third parties. Printed copies are working copies only.

4. Compliance Information

The software documentation associated with the data set contains compliance information:

4.1 - General compliance information

4.2 - “Algorithms to Review”-chapters showing general compliance information, including Compliance-related calibration hints.

The compliance information includes information, regarding the utilization of the ECU and the software in the OEM’s vehicle. Any compliance information shall not dispend the OEM from its responsibility and its obligation (i) to verify and demonstrate the conformity of the application of the calibrated software in the vehicle with any applicable law and (ii) to comply with relevant type approval and disclosure requirements under any applicable law.

The compliance information is based on and limited to our current actual knowledge. It is based on the assumption that content of the software which cannot be viewed and assessed by Bosch is designed, implemented and calibrated in compliance with applicable law and does not use software functions of this release improperly in other software functions of the ECU or other control units.
